### TESTIMONIAL FOR "WELLNESS AT WORK LTD

In February 2008 I had a Laparoscopy and was diagnosed with "**Grade 4 Endometriosis**". This was a cost to us of \$7,000. I was told that I required urgent surgery to remove my Uterus and the Endometriosis in which had also spread through my pelvic region.

This surgery required two specialist surgeons because it was going to be very complicated. Every day I was having extreme pain and unable to work for a complete week each month, pain killers were no longer working.

In May 2008 my Uterus was removed and I was told by my Surgeon "Dr Stewart Hastie" that they had cut away all the Endometriosis. This surgery had added a cost of \$20,000, now totaling \$27,000. All of our savings now gone.

Two months later the pain returned. I went back to my surgeon and he placed me on a drug called "**Dimetriose**". Within 3 weeks I had lost all my hair and become extremely sick. After two months of this drug my surgeon then took me off the "**Dimetriose**" and told me he could no longer help. He would apply for some more drugs possibly "**Zoladex**" and put me onto the Waikato hospital waiting list for more surgery even the removal of my ovaries.

By this time I decided to see my 2<sup>nd</sup> surgeon "Dr V.P. Singn" who now told me the pain was all in my head and was possibly neurological and that I needed to go see the "Pain Specialists" and would cost a further \$500 for an hour visit and they would put me on more drugs. In the meantime Dr Singn placed me on "**300mg of Neuronton**" 3 times a day and a large dose of "**Tremidol**" and a slow release "**Tremidol**" that would remain in my system. These drugs had thrown me into a floating type trance every minute of the day and not able to function, even to the point of blacking out many times during the day. When I went back "Dr V.P. Singn" was still insisting on getting more drugs.

At this stage I was very desperate for help and the pain was still progressing stronger and stronger and again I was back to having days off work from running my business.

Three weeks ago I was told to go see Chris Toal and Danny Orani at "**Wellness at Work Limited**" in Auckland. By this stage I had nothing to lose as I was no longer coping with all the drugs and no answers.

I am now completely drug free and have exercised for the first time in 18 months on their **"BodyWall"** and nearly completely pain free. The first and 2<sup>nd</sup> treatment was excruciating as they worked around the pelvic and abdominal regions but believe me since my third treatment I have never looked back.

I have recommended Chris and Danny to everyone I have come in contact with who have ailments. I cannot thank these two gentlemen enough. If I knew what they could do 18 months ago I would have not wasted all our savings on the poor judgments, the non sympathetic care that our surgeons and the Waikato hospital board have today. The hospital did not even recognize the seriousness of Endometriosis in which one in four women have today – and that's a very sad fact.

Thank god for Wellness at Work Ltd, we finally have people who know what healing the body really means and don't charge the earth for good health.

**Kind regards**
