To whom it may concern.

I have been referring patients for treatment at Bodywall for the last 3 years. In particular, I have been referring patients suffering from burn & keloid scars, endometriosis, Dupuytren's contractures, and all those patients requiring physiotherapy. Chris and his team of physio and massage therapists have achieved outstanding results with patients that I have sent their way. His use of Bodytool and Bodywall in soft tissue and musculoskeletal work to assist healing and rehabilitation, are second to none. His non surgical scar remediation techniques are incredible. I would not hesitate to recommend him to all those that are seeking results, particularly in those patients who have chronic conditions refractory to treatment.
